ACADEMIC PROJECTS IN FINANCE

Financial analysis of Polestar (PSNY) – Valuation & Equity Research — **OsloMet, 2026**
- Restated financial statements from LSEG data and computed NOPAT, invested capital and ROIC
- Built a 10-year DCF valuation under 3 scenarios (~8% cost of capital) with sensitivity analysis on WACC and terminal growth
- Issued a Sell recommendation in a group report and oral presentation; analysed the company's ESG profile

Optimal investment strategy – Business Analytics — **OsloMet, 2026**
- Compared bank deposits, rental real estate and an ETF portfolio over 20 years using 1,000 Monte Carlo simulations
- Led the banking module and the decision-theory analysis (Maximin, Hurwicz, minimax regret, EMV, EVPI) in Excel

Stochastic modelling – Bak-Tang-Wiesenfeld sandpile — **Paris 1, 2026**
- Implemented a self-organised criticality model in SAS and applied it to financial market dynamics

PROFESSIONAL EXPERIENCE

Autolyzer — **Oslo, Norway**
Data Analyst Intern — *Mar. 2026*
- Built an Excel model measuring Human-AI decision alignment on repair vs replacement recommendations (alignment by damage type, AI confidence and price gap, confidence intervals, alerts, cost impact)
- Designed the model so managers can load new claim data and read results directly
- Analysed the Norwegian market (trends, competitors, TAM/SAM/SOM sizing) to identify opportunities for the company

European University — **Kyiv, Ukraine**
Assistant to the Dean — *Dec. 2021 – Feb. 2022*
- Processed and stored data, provided administrative support, promoted the faculty to international students on social media
